Digital images are preferred, preferably not smaller than 640 pixels by 480 pixels in dimension. Images from cell phones are frequently too grainy to post online; images from digital cameras are usually much better. We want the images to be clear so others can enjoy viewing them.

Due to the design of our Web site, images with a horizontal orientation are preferred, as they're easier to put on the front sections.

If scanning an existing print, select 100 percent size with 72 dpi resolution, and save the resulting file to JPEG (.jpg) format.
