ISOLATE YOUR EYES
COCOONS

COCOONS NEW COLORS

All six sizes of Cocoons are now available in a fashionable burgundy or sensible slate finish. Each frame color is available with a choice of amber, gray, copper or yellow Polaré® polarized lenses. All Cocoons OveRx® sunglasses include a custom neoprene case, large lens cloth and a limited lifetime warranty.

COCOONS
SNAP ON

COCOONS SNAP-ON

The Cocoons Snap-On collection merges revolutionary rimless clip-on design with the world renowned polarized Polaré® lens system. The patented "butterfly" design features a variable depth bridge mount and adjustable lens position to deliver a custom fit that provides a seamless match with 95% of today's plastic, metal and rimless prescription eyewear styles.

COCOONS
SIDEKICK

COCOONS SIDEKICK

SideKick's unique design features additional light filtration from above and the peripheral. The Polaré lens system is available in a range of low vision tints, each delivering specific UV absorption and contrast enhancement. Although a patient's eyes are isolated from untreated light better than any conventional flip-up design, SideKicks are offered at the same cost, delivering a superior solution for various vision ailments. As with all of our patented products, Sidekick features a limited lifetime warranty.

LIGHTGUARD™ LIGHTGUARD

New post-op eyewear is designed to deliver maximum protection from UV, reduce glare and minimize direct air flow that can irritate sensitive eyes following surgery. Styles are available in sport wrap and OverRx models to suit all patients' needs. Best of all, LightGuard is available for FREE to qualifying ECPs.

VISTANA

NEW VISTANA COLOR

The Vistana collection receives a new glossy burgundy frame finish for 2010! Vistana® departs from traditional over prescription sunglass designs to achieve fashion driven frame styles without sacrificing the desired and proven OverRx® performance. The patented collection features scratch resistant Polaré® polarized lenses with Dynamic Base Lens Technology that eliminates the need for separate side shields.
